

# Course Assignments (C++ | Algo++ | Interview Prep)

*UPDATE* - Now you can attempt assignments after each section. Those who want to solve on HackerBlocks can solve there as well.

All assignments are hosted as contests on [HackerBlocks \(http://hackerblocks.com/contests/\)](http://hackerblocks.com/contests/) or you can attempt them directly through online platform challenges section.

This assignment is mandatory for all. Passing score is 70% of the total points. Each question is of 100 points.

We are releasing UNLOCK Editorial feature by mid november, you will be able to see editorials and test cases after that, however you will not get any score after unlocking editorials. For difficult problems you can wait for few days, for editorials.

Assignments in challenges section, are sorted according to difficulty last 3-4 questions in each section are harder, so dont worry if you are not able to solve some of them.

## Doubts and Discussions

All doubts should be posted to [Discuss \(https://discuss.codingblocks.com/c/complete-cpp\)](https://discuss.codingblocks.com/c/complete-cpp)

<https://discuss.codingblocks.com/c/complete-cpp>

Some Common Guidelines while using Discuss

- Don't ask for direct/ solutions or codes
- Give Proper title to your doubt, give question and solution link after saving at CB IDE
- Mention where you are stuck in the code/ or what problem you are facing clearly.
- Upvote/Like helpful answers
- Help others by solving their doubts, like and upvote relevant questions and answers.
- Avoid Spamming or any type of promotions, otherwise you will be disqualified
- Our TA's monitor discuss daily and your doubts will be answered on daily basis

Happy Programming ! :)

Regards

Prateek Narang
